

# 2010 Ergonomics Seminars

Find It ▪ Fix It ▪ Learn It

## Increase Productivity and Accelerate Health and Safety Excellence!

Learn to make simple and effective human performance improvements in the workplace with these open-enrollment training programs offered by Humantech's experienced ergonomists. Hands-on problem solving methods will help you recognize, evaluate, and control ergonomic risk.

### Applied Industrial Ergonomics

This two-day course introduces a job improvement process integrating simple assessment tools, low-cost and high-impact solutions, and productivity improvements. The program is intended for health and safety professionals, ergonomics committees, and manufacturing engineers.

New!!!

### Advanced Ergonomic Design Workshop

This new course is labeled "Workshop" for a reason. We take you beyond the identification and assessment of ergonomic risk, and head into "designing out" the risk in the first place. Through group activities and a unique simulation exercise, you'll learn specific design guidelines for workstations, tools, controls and displays, and manual material handling; how to apply ergonomics criteria to equipment design; and how to evaluate proposed and existing equipment. You'll have the opportunity to bring your own project materials for a hands-on case study. The workshop includes The Handbook of Ergonomic Design Guidelines, a \$385 value.

## Courses, Locations, and Dates

	Applied Industrial Ergonomics	NEW! Advanced Ergonomic Design Workshop
